Technical Skills

Languages: Python, C#, TypeScript, JavaScript, Go, SQL, C/C++, HTML/CSS
Backend & Databases: .NET Core, FastAPI, Flask, Node.js, REST APIs, Microservices, PostgreSQL, BigQuery, Firebase
Cloud & DevOps: AWS (CDK, IAM, Route53), GCP (Cloud Run, App Engine, Cloud Functions), Terraform, Docker, Pants, CI/CD
AI & Frontend: Gemini API, Claude Code (Custom Skills), Glean AI (RAG), Google Cloud ML APIs, React, Angular

Experience

Zocdoc Pune, Maharashtra
Senior Platform Engineer *Mar 2025 - Present*

- Developed internal backend tooling, CLI, and code-generation templates in **C# (.NET), Go** , standardizing microservice architecture and quality checks for **200+ engineers across 40+ teams**
- Led the IaC migration of a **20+ app monorepo** and 4 Ansible repositories to **AWS CDK** and the **Pants** build system, automating dependency updates and reducing CI build times by **45%**
- Built reusable **Claude Code skills** and automated verification workflows to standardize Blue-Green infrastructure migrations and smoke test execution across all production web applications
- Designed a custom **Glean AI Platform bot** indexing internal source code and Slack history to automate platform Q&A, resolving ∼**90%** of developer queries without manual intervention
- Handled multiple on-call incidents, at different SEVs for core platform infrastructure, permanently resolving critical DNS outages that halted org-wide pipelines, IAM permission bottlenecks, and TeamCity backup failures

Egen Hyderabad, Telangana
Senior Application Developer *Dec 2021 – Mar 2025*

- Led a **10+ engineer team** to architect and deliver **15+ enterprise backend and data platforms** using Python, PostgreSQL, and BigQuery for HCA Healthcare, securing a multi-million-dollar contract expansion
- Spearheaded backend engineering for a clinical Patient Summarizer, building high-throughput Python PDF parsing pipelines with **Google Gemini APIs** to extract structured medical records and cut manual review time by ∼**60%**
- Designed scalable REST APIs, relational schemas, and asynchronous data processing workflows to consolidate multi-source healthcare datasets with low query latency
- Implemented multi-cloud CI/CD pipelines (**GitHub Actions**) and modular **Terraform/Docker** infrastructure automation, cutting release deployment times by **65%**
- Mentored junior engineers on backend architecture, code reviews, and sprint execution; received the **5-Year Excellence Award** for sustained technical leadership

Application Developer *Jun 2019 – Dec 2021*

- Engineered high-concurrency backend services and web portals on **GCP (Cloud Run, App Engine, Cloud Functions)** for COVID-19 vaccine management platforms, reliably scaling to **10M+ users**
- Core backend developer for the **DocBot platform**; re-architected Python multiprocessing pipelines and Cloud ML integrations to boost document ingestion throughput by **2.5x** and cut API latency by **35%**
- Delivered **20+ production applications** with secure REST APIs and reusable UI components (Angular), driving a **25%+** increase in user engagement and onboarding **15+ enterprise clients**
- Partnered with Technical Program Managers (TPMs) on system design, effort estimation, and coding standards across healthcare engineering teams

Education

Indian Institute of Information Technology (IIIT), Sri City Chittoor, AP
Bachelor of Technology in Computer Science (Honors) *Jul 2015 – Jun 2019*

- **Achievements:** National Finalist in the 1st Smart India Hackathon (SIH); 1st Place Winner at 2 college hackathons
